## About Quicpro Security Solutions

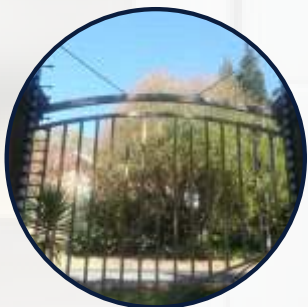

Quicpro Security Solutions was founded in January 2008 by Quintin Pearce, who manages each installation personally to ensure the best possible service in the most reasonable amount of time.

Quintin has more than 14 years technical & hands-on experience in the security industry in the installation of Alarm Systems, Electric Fencing, CCTV, Gate Automation, Steel Work, and Access Control Systems. He has completed numerous courses with the various manufacturers of security equipment. He only believes in products that deliver, and only provide his clients with expert advice.

Quicpro Security solutions distinguishes itself in the security industry as a competent, reliable, friendly and professional service provider in and around the greater JHB area.

We truly care about our business we are committed to providing our customers with smart, quality and cost effective security solutions. Our promise to you is Quality, Peace of Mind & Security. Our customers and staff are our most important 'assets' in our business.

We do our own design and manufacturing of steel security products as well as structural repairs and maintenance thereof.

Quicpro Security solutions caters for the domestic, commercial and industrial markets. Our clients include private home owners, residential complexes (including body corporates) office parks, factories, night clubs & schools.

Each project is personally managed by Quintin to ensure that the final outcome of each project is safe, secure, appealing, delivers great value for money and that each client is 100% satisfied. We welcome customer's feedback!

## Our Products & Services

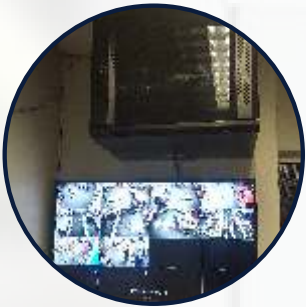

### Electric Fencing

An electric fence is your first defense against intruders. When correctly installed, it is not only a physical barrier protecting you & your family, it is also an early warning that an intruder is attempting to enter your property.

All our fences are installed with the security of you and your family in mind. Because of this, we install your fence with none of the "gaps" seen in many electric fences.

We offer a unique double fence, which is basically 2 electric fences installed as a single fence, making more secure than the standard electric fence.

Choosing Quicpro Security to install your electric fence will not only improve the security of your property, but it will also increase the value of your property as all our fences come with a C.O.C certificate and an industry first 3 year warranty on all new installations.

### Alarm Systems

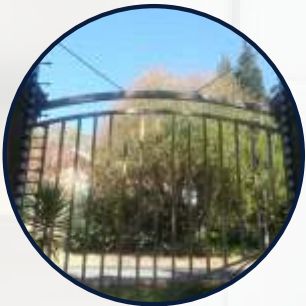

An alarm system is another line of defense against intruders. If correctly installed, it is an early warning system which will alert you that someone is attempting to enter your home uninvited.

When someone triggers the alarm, a panic signal can be sent to any armed response company, alerting them that something is wrong.

Your alarm system is installed with the safety of you and your family in mind. This means that all sensors are optimally placed for maximum efficiency.

Factors such as whether you have pets, uneven ground and swimming pools will be taken into consideration when deciding what type of sensors to install. Taking all these factors into account, we will take all the precautions to avoid regular false alarms.

We offer wired and wireless options, depending on your individual requirements and preferences.

## Our Products & Services

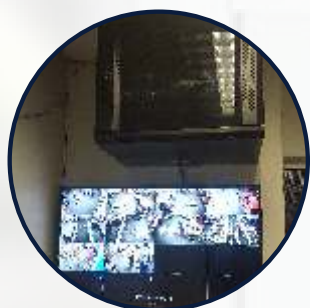

### CCTV Security Cameras

A CCTV (Close Circuit Television) system allows you to view and record what is happening at your home or business at once from one central location without putting yourself in danger even when you are not there and can act as an early warning system when you are home.

With modern technology, you can view the feed from your security cameras on your phone, tablet or laptop from wherever you are.

All our camera systems are installed with the security of you and your family in mind. Because of this, we install your CCTV system in the optimal positions to avoid blind spots, focusing the cameras on your main entry points to your property and cover as big an area as possible with each camera to maximize visibility and minimize costs.

We offer a unique CCTV and alarm system integration method that causes certain cameras to go full screen automatically when the alarm has been triggered in the area where that camera is focused on the monitor.

### Security Lighting

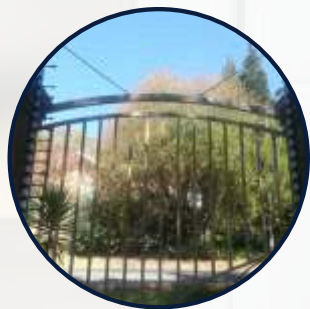

Lights are a burglar's worst enemy. This is why often, burglars dress in black to blend in with the darkness. They learn to navigate by touch and rely on their fingers for many things. If you want to keep the burglars and prowlers away, you should take your home's lighting status very seriously.

Outdoor lighting can help to ward off the attention of unwanted intruders. Burglars generally look for easy targets that won't attract attention to them. Having outdoor lighting installed at your home is one of many things you can do to make your home more secure.

Lights that are higher from the ground, shining downwards will light a bigger radius, meaning less blind spots. This will also cause less light pollution (and lower electricity bills!) as you'll need fewer lights.

Intruders can, and will, cut the power to your lights to help them slip into your home unnoticed. To avoid this, we generally install outdoor security lights in such a manner that the wiring is harder to tamper with.

As you can see, having quality security lighting will not only benefit your safety, but also your peace of mind when you feel safe and secure enough to leave your home, knowing that you'll return to all of your valuables.

## Our Products & Services

### Steel Security

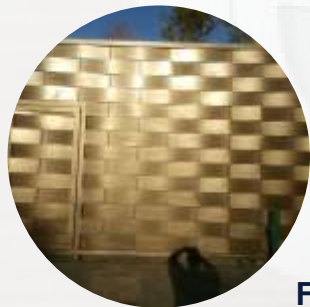

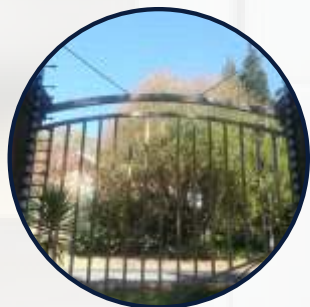

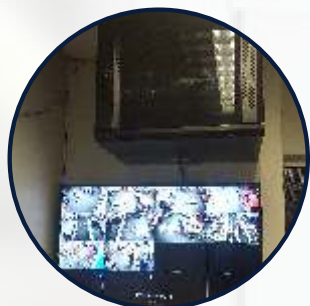

We are just as passionate about your steel security as we are about every other aspect of securing you, your home, your family & your business.

We use only quality supplies in the manufacturing of all steel security products. We enjoy letting our creative juices flow to create exactly what our clients request.

Whether you want decorative security, or standard strong security, we aim to give you exactly what you want, ensuring that everyone ends up happy.

#### We specialize in the design, manufacture and installation of:

Ballustrades	ClearVu Fencing
Security Gates	Pedestrian Gates
Burglar Bars	Garden Gates
Driveway Gates	Swimming Pool Fencing
Palisade Fencing	Carports

## Testimonials

"In December 2011 lightning struck my home and destroyed my alarm system. After a number of security system providers tried unsuccessfully to repair my system, Quintin Pearce of Quicpro Security Solutions not only diagnosed the problem correctly but was able to repair it. He worked tirelessly together with a colleague until the repair was complete.

Since then I have used Quicpro Security and in particular Quintin Pearce exclusively to do all the maintenance and repairs on our system. In the meantime he has installed a new system which is an upgrade and this has been a very successful installation. Quintin provides good advice and provides perspective and options when dealing with issues.

I have always found Quintin to be reasonable when he quotes for work.

Furthermore my family feels safe and comfortable when he and his colleagues are doing work at my home. To date he has not let me down and I can call him virtually at any time of the week and he tries to help or give advice. He has a good understanding of the technologies associated with alarm systems, security/electrified fences, motorized gates and intercom/video systems."

– Bernard Klingenberg, Rosebank

## Testimonials

"Security work was done on our premises by Quicpro Security Solutions. We are very grateful and satisfied with the way that Mr Quintin Pearce conducted the work in a very professional, neat and very tidy manner.

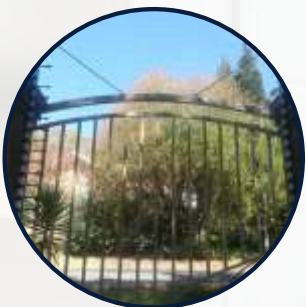

He is very trust worthy and can be called upon any time and will always come to assist with a problem that you might have. He installed a wireless paradox beam system around the house and sensors in every room on windows and doors and a maglock onto the main gate linked to the alarm system.

A very professional job done. We would recommend Quicpro Security Solutions to anyone" – *Mr & Mrs Pemberton, Weltevreden Park*

"Just a big note of thanks for the excellent work that Quicpro Security are doing for me on an ongoing basis. They installed my alarm system about 3 years ago. I was so impressed with their professionalism that I got them to install my electric fence and upgrade my alarm system to include some new wireless technology. Due to the neatness of the first cable work, the upgrade was done in a short period of time.

I found Quintin to be very knowledgeable on all the different options that can be used to enhance my security.

He also suggested some CCTV cameras with the best infrared capabilities for my needs at a reasonable price. The installation of all the different services were very neat. I will use Quicpro Security in the future again and refer them to my friends. Thanks for a great job and keep up the good work." – *Mrs Serfontein, Randfontein*

"Dear Quintin

This is just a thank you note for the service you have provided over the last couple of years.

As an elderly couple our first line of defence is our electric fencing. You have installed this a couple of years ago and it has been working very well – despite the fact that our garden has many trees. More important, though, is the fact that you have not "disappeared" – like so many contractors do. You have always been there when we needed you. Whether this was for a new battery, being re-connected to the security company or just basic maintenance.

P.S. Thank you for keeping your call out fee and charges at a level that is affordable." – *Jorrie & Almarie Jordaan, Northcliff*
